PU Roll Mill Jar

PU Roll Mill Jar

## Feature

1. Good wear-resistance, no scratch, no noise, long service life and low cost.
2. High mechanical strength, good elasticity, good recoverability.
3. Temperature resistance within  $-20^{\circ}\text{C}$  to  $120^{\circ}\text{C}$ .
4. Oil resistance and anti-aging, good weather resistance, long life long of 15 to 20 years.
5. No pollution, non-poison and no smell. [http://dict.youdao.com/javascript:void\(0\);](http://dict.youdao.com/javascript:void(0);)

## Parameter of PU Roll Mill Jar

| Model | Outside Diameter (mm) | Internal Diameter (mm) | Height (mm) |
|-------|-----------------------|------------------------|-------------|
| 100ml | 68                    | 53                     | 69          |
| 250ml | 98                    | 74                     | 90          |
| 500ml | 106                   | 87                     | 104         |
| 1L    | 132                   | 105                    | 135         |
| 1.5L  | 132                   | 116                    | 161         |
| 3L    | 159                   | 139                    | 223         |
| 5L    | 192                   | 168                    | 251         |
| 10L   | 243                   | 219                    | 286         |
